

# Catecholamines (Urine)

**SAMPLE REQUIRED:**

Urine, minimum 10ml, frozen

**BLOOD TUBE REQUIRED:**

Sterile contained, frozen

**Indications:**

- For evaluation of adrenal masses where excessive catecholamine production is clinically suspected.

**Collection Protocols:**

1. The owner is to collect a urine sample (Minimum 10mL) at home (stress-free conditions) and then freeze immediately.
2. The sample must then remain frozen the entire time prior to submission and samples must then be sent frozen to the laboratory.
3. Specifically request a frozen sample collection by courier.
